

## Change in the lead partner of a project activity to reduce upstream emissions according to UERV (Upstream Emission Reduction Ordinance)

With the change of the lead partner the new lead partner is the sole lead partner of the aforementioned project activity within the meaning of Section 2 (8) UERV.

### Essential Information

Reference Number of the project activity:

Project number (if provided):

Date of approval (if the project activity has been approved already)

### Current lead partner of the project within the meaning of Section 2(8) UERV

Company:

Address, House number:

Town, Post code:

Country:

Authorised person:

Phone/fax:

Email address<sup>1</sup>:

### New lead partner of the project within the meaning of Section 2(8) UERV

Company:

Address, House number:

Town, Post code:

Country:

Authorised person:

Phone/fax:

Email address<sup>1</sup>:

---

<sup>1</sup> By providing an email address you consent to receiving formal communication (including formal notices) to this email address.

Project name:

City, region, country of project:

Project site (coordinates):

Longitude:

Latitude:

Date of planned project start:

Start of the offsetting period  
(preliminary information):

Name and address of the  
commissioned validation body:

**With regard to the amount of the security to be specified in the approval notification, the new lead partner declares the following:**

Type of project activity,  
applied methodology:

Estimated volume of upstream  
emission reductions during  
the project's crediting period  
in kg CO<sub>2</sub>e:

Anticipated market value of an  
UER certificate certifying  
1,000 kg CO<sub>2</sub>e

### The new Lead Partner declares that ...

the project activity shall not result in a reduction in greenhouse gas emissions, either directly or indirectly, from an installation that is governed by Directive 2003/87/EC (EC Emissions Trading Directive). **Yes** **No**

no application<sup>1</sup> has been submitted in any other Member State with the aim of offsetting against the fulfilment of obligations that serve to implement Article 7a of Directive 98/70/EC (Fuel Quality Directive) as regards upstream emission reductions as a result of the project activity, **Yes** **No**

the project activity has no serious adverse effects on issues laid out as per the preamble of the Agreement on 12 December 2015 (BGBl. 2016 II S. 1082, 1083 – “Paris Agreement”) within the host country. **Yes** **No**

### The new Lead Partner declares that he is committed to ...

refraining from simultaneously generating electricity from the project activity for which payments are to be received pursuant to Section 19(1) of the Renewable Energy Act or supplementary payments pursuant to Sections 6 to 13 and 35 of the Combined Heat and Power Generation Act, **Yes** **No**

cooperating with and accepting checks and regulations under this Ordinance, especially with regard to specifying and opening rooms on request, presenting business documents, making copies, excerpts, printouts or duplicates of business documents at one’s own expense and providing information required, **Yes** **No**

refraining from submitting an application in any other Member State with the aim of offsetting against the fulfilment of obligations that serve to implement Article 7a of Directive 98/70/EC as regards upstream emission reductions achieved as a result of the project activity before, during or after the end of the crediting period, notwithstanding Section 29(2), **Yes** **No**

informing the German Environment Agency about the verification body commissioned prior to the start of the crediting period. **Yes** **No**

### Optional information

The Lead Partner agrees that upon project approval the German Environment Agency will publish the name and address of the project promoter on its website as well as the number with which the calculation methodology is clearly identified (Section 13(2) UERV). **Yes** **No**

<sup>1</sup> An application for approval of a project activity or an application for issuing UER in another EU Member State must not have been submitted.

**The new Lead Partner of the project is aware that the German Environment Agency is obligated to publish the following information on its website following project approval:**

- ▶ the date of issuing the approval notification, Section 13(1) No. 1 UERV,
- ▶ the annual upstream emission reductions in kilograms of carbon dioxide equivalent calculated based on the calculation method, Section 13(1) No. 2 UERV,
- ▶ the number used for the clear identification of the calculation method, Section 13(1) No. 3 UERV,
- ▶ the project site which is the closest to the source of the emissions, by reference to longitude and latitude coordinates to four decimal places, Section 13(1) No. 4 UERV,
- ▶ the beginning of the crediting period, Section 15(3) UERV.

**Changes to the information in this form regarding the new Lead Partner and the project activity must be reported to the German Environment Agency without delay.**
